

Ms. Gina Ward is a truly an amazing individual! She has been an inspiration to several people for over many years! As the founder of Old Peachtree Montessori School, Ms. Ward has over 15 years of educational experience: teaching children, directing teachers, and providing a multiple of services to the community.

It has been a pleasure working with and learning from Ms. Ward over the three years that I have known her. As a Director of Education, Ms. Ward has worked to improve the quality of inter-relationships between students, parents, and teachers. She possesses profound wisdom in counseling others on how to more effectively communicate in a positive and respectful manner. I have observed Gina utilize skills of conflict resolution and communication to help students resolve conflicts, improve management of their anger/frustrations, and better control their behavior. In addition, Ms. Ward has been successful at teaching children how to become more conscious of their decisions/choices and their potential outcomes that may have resulting consequences.

Ms. Ward has been successful with improving the quality of communication between teachers and children, parents and teachers, and parents and children as well. She has culminated her professional teaching experience and knowledge from Montessori training, workshops, and conferences to address topics of Montessori education, positive discipline, effective communication, and inclusive teaching: acknowledging different learning styles. Ms. Ward's leadership and counseling have been invaluable assets to teachers and families!
